PROFESSIONAL SUMMARY

Java Full Stack Developer with around 2 years of experience building and maintaining applications using Java, Spring Boot, Microservices, Redis, Hibernate, JPA, Spring Security, REST APIs, JWT, and MySQL. Experienced in developing backend services, implementing role-based security, integrating databases, optimizing APIs, and collaborating in Agile development teams. Familiar with React.js for developing and integrating frontend applications with backend REST APIs.

TECHNICAL SKILLS

Languages	Java, JavaScript, SQL , C++
Backend	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Microservices, REST APIs, JWT Authentication
Frontend	React.js, Tailwind CSS
Database	MySQL, MongoDB
Tools	Git, GitHub, Postman, IntelliJ IDEA, VS Code, GitHub Copilot
Concepts	OOP, Collections Framework, Exception Handling, Multithreading, Streams, Redis

EXPERIENCE

Engineer | Virtusa Feb 2025 – Present
Bengaluru, India

- Developed and maintained Spring Boot microservices exposing REST APIs for application features and business workflows.
- Implemented request validation and centralized exception handling to provide consistent API responses and improve backend maintainability.
- Developed secure backend services using Spring Security and JWT-based authentication, implementing role-based authorization across multiple user roles.
- Designed and implemented database operations using Spring Data JPA and Hibernate, including entity relationships, repository queries, and transactional operations.
- Optimized SQL queries and backend processing for frequently used APIs to improve application response times and database interaction efficiency.
- Implemented Redis caching for frequently accessed data to reduce repeated database queries and improve read performance.
- Participated in code reviews and followed coding best practices, code reusability, and project standards.
- Worked in Agile/Scrum teams, participating in sprint planning, backlog refinement, daily stand-ups, defect resolution, and release activities.
- Used Git, Jenkins, OpenAPI, and Postman for source control, API documentation, and API testing.
- Collaborated with frontend developers to integrate React.js applications with Spring Boot REST APIs.

ACHIEVEMENTS

- Solved **1,000+** Data Structures and Algorithms problems on LeetCode using Java.
- Achieved a maximum rating of **2000+** on LeetCode, demonstrating strong competitive programming and algorithmic problem-solving skills.
- Participated in **50+** competitive programming contests across LeetCode, CodeChef, Codeforces, and other coding platforms.

PROJECTS

ReWear – Clothing Exchange Market **Live Link | Demo Video | GitHub**

- **Technologies:** Java, Spring Boot, Spring Security, JWT, React, Tailwind CSS, MongoDB Atlas, Docker, Render.
- Built and deployed a full-stack marketplace for one-for-one clothing swaps, connecting item listings and swap-request workflows in a single application.
- Implemented secure REST APIs with JWT authentication, role-based access control, and ownership validation to protect user and item operations.
- Developed swap-request checks for item availability and conflicting requests; integrated real-time chat, cloud-hosted images, and an administrative dashboard where implemented.

WealthWise – Finance Tracker **Live Link | GitHub**

- **Technologies:** Java 25, Spring Boot, Spring Security, JWT, React, Vite, Tailwind CSS, PostgreSQL, Hibernate, Chart.js, Docker, Render.
- Developed and deployed a full-stack financial management platform enabling users to track income, expenses, budgets, savings goals, financial habits, assets, and liabilities.
- Implemented secure REST APIs with JWT authentication, role-based authorization, and user-specific data isolation using Spring Security and PostgreSQL.
- Built interactive financial dashboards using React and Chart.js to visualize spending patterns, monthly cash flow, savings progress, and net worth.

E-Commerce Microservices Platform **GitHub**

- **Technologies:** Java, Spring Boot, Spring Data JPA, Hibernate, PostgreSQL, MySQL, MongoDB, REST APIs, Docker, Docker Compose, Maven.
- Designed a modular e-commerce backend that separates core business capabilities into independently organized Spring Boot services.
- Implemented REST endpoints and persistence layers using Spring Data JPA/Hibernate and database technologies selected for individual services.
- Used Docker Compose to run implemented services and supporting database dependencies in a reproducible development environment.

CERTIFICATIONS

- Scrum Fundamentals Certified (SFC) **Verify Certificate**
- Data Structures and Algorithms Using Java – Udemy
- Java Spring Boot Microservices – Udemy
- AWS Cloud Fundamentals – Udemy

EDUCATION

Bachelor of Engineering in Computer Science 2021 – 2025
SDM College of Engineering & Technology, Dharwad, Karnataka **CGPA: 9.2/10**

Pre-University Course (PCMB) 2019 – 2021
Government PU College, Gadag, Karnataka **95%**
